- Engineered backend services handling 50K+ daily transactions with amount (almost €100k) high reliability handling high-volume transaction processing
- Optimized database queries and backend services improving API response time by 35–50 resulting in significant improvements in API response time and system performance
- Designed and implemented scalable payment orchestration supporting multiple PSPs with high daily transaction volumes
- Developed fintech features including: Virtual card issuance systems, Crypto buy/sell integrations
- Digital currency transaction processing
- Transaction monitoring and risk scoring modules

Software Engineer (PHP, Laravel, Yii2, Vue.js, POS, Marketplace)

RepairDesk PVT LTD **Apr 2021 - Jun 2022 (1 year 3 Months)**

- Contributed to full Software Development Life Cycle (SDLC) including requirement analysis, system design, database architecture, development, testing, and deployment
- Designed and optimized MySQL database schemas for POS and marketplace platforms improving system scalability and data consistency
- Developed core modules for POS and repair marketplace platforms including service management, inventory tracking, invoicing, and customer management
- Built repair store management solutions enabling businesses to manage repair tickets, invoices, payments, and customer records from a centralized platform
- Implemented third-party business intelligence and analytics tools including Mixpanel, Segment, Satismeter, Usermaven, and Hotjar to improve product insights and user behavior tracking
- Developed RESTful APIs and backend services using Laravel and Yii2 to support POS operations and marketplace integrations
- Collaborated with cross-functional teams to deliver new features and improve product stability

Software Engineer (PHP, Laravel, JavaScript, Vue.js, Appointment Systems)

MsnSoft **Aug 2019 - Mar 2021 (1 year 8 Months)**

- Designed and implemented an online appointment and healthcare platform, enabling patients to book appointments, lab tests, and video consultations with verified doctors across Pakistan
- Developed secure backend services using Laravel and interactive front-end dashboards with Vue.js, providing seamless user experience for both patients and doctors
- Built scalable appointment booking system handling high daily traffic and ensuring reliability and performance
- Implemented features for online consultations, notifications, and scheduling management, improving patient engagement and platform efficiency
- Collaborated with cross-functional teams to deliver end-to-end healthcare solutions, meeting project deadlines and exceeding client expectations
- Focused on clean code, performance optimization, and maintainable architecture, contributing to long-term project stability

PROJECTS

CardEye - Self-Hosted Payment Gateway

Technologies: PHP, Laravel, Vue.js, MySQL, PSP'S, Third-Parties, Payment Gateway Integration

Live: https://cardeye.com

- CardEye is a modern payment gateway designed to help businesses maximize profitability by offering a range of features that aim to shorten transaction times.
- Supports multiple PSPs including Stripe, Worldpay, Checkout.com, Apple Pay, and Google Pay
- Developed core risk and transaction modules including fraud scoring, deny lists, refunds, and chargeback management
- Implemented security features including OTP, MFA, and KYC integrations (Onfido, seBankID, Alice AML)
- Improved system performance and reporting through third-party fraud integrations and database optimization

Forborga – Crypto & Virtual Card Wallet

Technologies: PHP, Laravel, Vue.js, MySQL, PSP'S, Third-Parties, Payment Gateway Integration

Live: https://forborga.com

- Forborga is a leading payment solution provider that offers convenient and secure options for individuals to make online payments.
- With a Forborga account, you can effortlessly create virtual cards, ensuring a seamless and hassle-free experience for your virtual debit card transactions.
- Developed a digital wallet platform supporting virtual card issuance, card management, and secure user account management
- Built modules for crypto-to-fiat conversion and digital payment processing
- Implemented secure authentication and login systems for user account protection
- Built user-friendly dashboards with Vue.js for transaction tracking, card management, and account settings
- Delivered a scalable solution supporting multiple payment types while maintaining high security and compliance standards
- Live platform serving real users, demonstrating trustworthy and convenient payment solutions

RepairDesk – POS & Repair Store Management Software

Technologies: PHP, Laravel, Yii2, Vue.js, POS, Inventory Management

Live: https://app.repairdesk.co

- Developed a comprehensive POS and repair store management platform for computer and mobile repair businesses
- Integrated modules for service management, inventory tracking, invoicing, and payment processing
- Built intuitive dashboards with Vue.js for managing repair tickets, customer records, and transactions from a single interface
- Delivered a scalable solution used by multiple repair stores, improving operational efficiency and workflow management
- Enabled businesses to streamline repair operations and provide better customer service

DoctorFindy – Online Doctor Appointment System

Technologies: PHP, Laravel, Vue.js, Appointment Scheduling, Telemedicine

Live: https://doctorfindy.com

- Developed core healthcare modules including appointment booking, lab test scheduling, and patient management
- Built medical content features including health articles and surgeries information management
- Implemented customer management and system configuration modules for platform administration
- Developed Laravel APIs and Vue.js dashboards for scheduling, notifications, and healthcare service management

Osteosynthesyis – Medicine Information Platform

Technologies: PHP, Laravel, Vue.js, CMS, Crowd-Sourced Content Management

Live: https://www.osteosynthesis.org

- Developed a medicine-related information platform supporting crowd-sourced contributions while maintaining content compliance
- Designed a scalable CMS system enabling contributors to submit articles, case studies, and medical content efficiently
- Implemented features to flag and remove sensitive or non-compliant content, ensuring platform integrity and regulatory adherence
- Delivered a live, user-friendly platform providing reliable and moderated medical information to a broad audience

EDUCATION

Bachelors of Science in Computer Science 2015 - 2019

COMSATS University Islamabad Pakistan

SKILLS
